

## How to use the Bentley BASH working with Caltrans Data set

The following assumes the following:

1. You have MicroStation V8i SS3 or higher
2. You have used the standard installation for the location of the software
3. Make sure MicroStation is not running

Do the following

1. Download the Dataset for the web to the C:\Temp\ folder  
<http://www.la-ocmug.com/SCBUG/styled-4/styled-5/index.html>

2. Extract the Dataset into the Temp Folder
3. A folder will be created named **\_\_BB 2018 Rio Hondo Data**
4. Open that folder
5. There should be one folder and 2 files
  - a. BASH\_CT
  - b. BASH\_CT.ucf
  - c. BASH\_CT.pcf
6. Copy each item to the following location
  - BASH\_CT to C:\ProgramData\Bentley\MicroStation V8i (SELECTseries)\WorkSpace\Projects\
  - BASH\_CT.pcf to C:\ProgramData\Bentley\MicroStation V8i (SELECTseries)\WorkSpace\Projects\
  - BASH\_CT.ucf to C:\ProgramData\Bentley\MicroStation V8i (SELECTseries)\WorkSpace\Users\
7. Launch MicroStation V8i and change the User and Project as shown in the following image.
