Tip of the day - Your MicroStation Medicine

 [Printable Version](#)  [E-mail this MicroStation Medicine to a Friend](#) Posted May 14th, 2003

[«« Previous](#) [Next »»](#)

MS_BLOCKLIST* versus *MS_CELLLIST

In MicroStation V8:

MS_CELLLIST is a list of cell library files to be searched for cells if not found in the current library.

MS_BLOCKLIST is a list of DWG/DXF files to be searched for AutoCAD blocks.

So the question is: Is there really a difference?

Phil Chouinard answered this on the v8.dwg newsgroup: "MS_BLOCKLIST and MS_CELLLIST essentially get to the same place in the code; they're named differently as a way to keep the chocolate separate from the peanut butter."
